## STORM WATER - CARS AND DRIVEWAYS

- Use a commercial car wash or wash your car on a lawn to prevent dirty, soapy water from flowing into the storm inlets.
- Check your car for leaks and make repairs as soon as possible. Clean up spilled fluids with an absorbent material like kitty litter or sand and dispose of it in the trash. Never rinse a spill into a storm inlet.
- Recycle used oil and other automotive fluids at service stations. Don't dump these liquids down the storm inlets or dispose of them in your trash.
- Use de-icing salts sparingly, as excessive amounts of these materials can harm water ways.

## STORM WATER & MOSQUITOES

- Look for possible breeding areas in your backyard.
  - Homeowners should check their property to eliminate mosquito breeding. Water can collect in unused flower pots, buckets, cups, tires, and other items that hold stagnant water and may provide the perfect habitats for mosquitoes.
- What can homeowners do to deter mosquito breeding?
- Pick up trash and old containers that may have collected in the yard and can hold water.
  - Clear clogged rain gutters.
  - Cover containers, tires, wading pools, and all other items that can hold standing water for extended periods of time.
  - Change the water in bird baths and pet dishes regularly.
